Participants needed

CONNECTED AUDIOLOGY READINESS EVALUATION (C.A.R.E.)

The researchers: Luisa Natalia Perez, MSc Candidate, Sheila Moodie, PhD, Susan Scollie, PhD, and Danielle Glista, PhD (PI)

This study involves filling out an e-survey called C.A.R.E. (Connected Audiology Readiness Evaluation), which aims to explore whether audiologists across Canada feel they are ready to adopt Connected Audiology and remote hearing aid fitting into clinical practice.

- ❖ Findings from this study will help guide planning, development and implementation efforts related to connected audiology.
- ❖ Your answers will remain anonymous.

Calling ALL Canadian Audiologists, regardless of practice experience! You only need 25 minutes (approximately) to tell us how you feel about connected audiology and remote hearing aid fitting.
